

Bulletin #2013-01

Date: January 23, 2013

From: Chuck Atkins, Time Attack Director

All series decals must be located on both sides of the car in a neatly presented manner. You are competing in the Regional Championship Series with regular coverage and photography of cars being featured in the media so it is important that all cars have the decals placed neatly to comply with our sponsor agreements. A haphazard decal layout will cause you grid delays to rectify this and possible disqualification.

Possible locations are along the rocker panels, stacked vertically down the front fender just in front of the front doors, on the side windows or on the door panels and using a magnetic backing if preferred.

You only have to run Contingency Sponsor decals if you are participating in that contingency program. Contingency sponsors are: Toyo and Yokohama Tires. If you are not running these decals then you will not be considered eligible for that contingency program.
