Ice Racing 2026

What is Ice Racing?

Ice racing is exactly what it sounds like: racing on a track made of ice.

Picture a typical racetrack but surrounded by snowbanks and sparkling with an ice surface that tests every ounce of driver control. Drivers navigate tight turns and long straightaways, while competing against other drivers, constantly adjusting their grip on the frozen surface and challenging their driving skills in ways that dry pavement could never offer.

A Message from Your New Director

Like many of you, I am committed to the sport because of the thrill of competition, the challenge of driving on ice, and the camaraderie that comes from spending cold weekends at the track with great people. We have something really special!

A huge 'Thank-you' to Ted Michalos for standing in as our Interim Director for the past three years. He has helped to keep our sport alive but we all need to do more.

We need to think outside the box, to grow participation of new racers, volunteers and fans and celebrate the incredible effort that goes into keeping this sport thriving each winter. It is going to take all of us, not just a Director.

I look forward to your continued support, participation and ideas!
